Hi Kyle,

Please find attached Badger Minerals' completed EDR forms for taking water out of Stockley Creek for use during our proposed drilling program in Schoepke Township, Oneida County. I have also included a location map and an email from Heartwood allowing us to use Stockley Creek as a water source on their property.

At this time we do not have a firm date for beginning our drilling program as we are still awaiting approvals from Oneida County and are also monitoring the current situation with COVID-19. However, it is likely that we would want to start during the spawning season restriction period (April 1 – June 1). Could you let me know if there is any additional information you might need from me to determine whether a waiver could be granted.

Sincerely,

Eric Quigley
